

visual timer | tangible time management

Over 20 years ago, Time Timer® inventor Jan Rogers set out to create a tool to help her youngest child understand and manage time. Her solution incorporated a red disk into a common kitchen timer to show the passage of time. As time elapsed, the red disk disappeared.

Realizing how this simple and effective tool could benefit anyone wanting to better manage time, she worked directly in classrooms with teachers and students to test and refine the Time Timer

prototype. The response was overwhelmingly positive. Today, Time Timer is helping solve time perception and management problems for people worldwide with its simple, visual depiction of elapsed time. Originally targeted to children and educators, the Time Timer's benefits have proven to be universal.

Time Timer is dedicated to making the concept of elapsed time easier to understand. Wherever time needs to be measured, the Time Timer line of products offers a unique and superior solution.

TTA1 - Time Timer Audible (8")

The size makes this our most versatile product for both individual and group applications. Designed to operate free standing or wall mounted.

TTA2 - Time Timer Audible (12")

This model is designed for classroom and group activities. Its large size and bold numbers make it easier to read for visually impaired users. Designed to operate free standing or wall mounted.

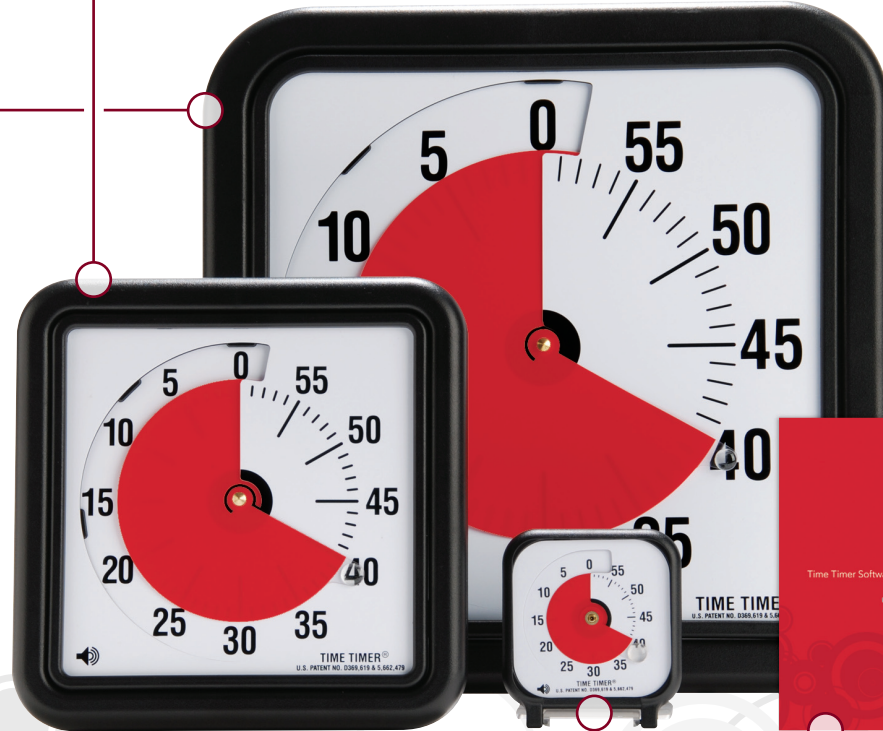

TTA4 - Time Timer Audible (3")

The small size and durable, lightweight construction make this model simple to carry for easy accessibility. A protective cover flips open to serve as a stand for the timer.

TT5 - Time Timer Software

This software provides innovative new ways to visualize the passage of time by allowing the user to work with hours, minutes, and seconds in "real time." Application window can scale on your screen as well as float on top of other applications.

**Windows & Macintosh Compatible.*

TTB1 - Time Timer Blanks (3 Pack - 8")

TTS1 - Time Timer Stickers (1 Sheet - 8")

TTB2 - Time Timer Blanks (3 Pack - 12")

TTS2 - Time Timer Stickers (1 Sheet - 12")

The add-on blank faces allow users to customize their timers with stickers, washable markers, etc., to mark the increments of time.

With the advent of the Time Timer came a nearly instant value base for time that levels the field, provides structure, deters the sense of free-fall and reduces anxiety.

It's portable, durable, easy to teach and use and promotes independence. It's a simple tool with tremendous power and potential in its use.

Clinical Habilitation Counselor

I use the Time Timer with both my younger and older students to help structure sessions. When I write reports and talk to parents and educators, I endorse your products because I see how well they work with kids who have procrastination and attention problems.

Educational Specialist

A great professional tool for boardroom use. Now our staff meetings are more efficient and end on time!

Company President

Join the thousands of educators, counselors, business managers, parents and individuals using Time Timer products to break through time perception problems.

how much longer?

Education

No other teaching aid reinforces the concept of elapsed time like the classroom-tested Time Timer. Its graphic depiction of time remaining is perfect for setting time limits, measuring the duration of activities and training students to make better use of available time.

Use the Time Timer in the classroom to:

- Help anticipate transitions
- Share toys, equipment or computer time
- Time standardized and speed tests
- Monitor rest time and "time out"
- Measure study, lunch and play periods

Special Needs

The Time Timer provides the ability to judge how much time is left without having to know how to tell time. Our products feature high visual contrast, large dial numbers and ultra-quiet operation, making them perfect for special needs, therapy sessions, stroke and brain-injury rehabilitation and geriatric care in both individual and group settings.

Special needs applications include:

- Guidance for individuals with ADD, ADHD and Autism
- Timing counseling and therapy sessions
- Memory-prompting for medications and appointments
- Self-monitoring activities of all kinds

Home & Work Life

Effective time management skills are critical to personal and professional success. Time Timer products make the passage of time obvious and tangible in both group and individual settings. Maximize productivity at home and in the workplace by setting time limits for activities and measuring progress against time.

Use the Time Timer to:

- Make meetings, panel discussions and presentations more efficient
- Quantify time left before appointments and deadlines
- Monitor break time
- Regulate study time, computer time, play time and "time outs"
